Srinagar, J&K

## SKILLS

**Programming:** JavaScript - HTML - CSS/SCSS - React JS - Framer Motion - MUI  
**Familier:** Node JS - PHP - MongoDB - MySQL  
**Other:** Git - Github - VS Studio - Postman

## PROJECTS :

### Youtube Clone | [Github](#) | [LiveLink](#) |

- YouTube clone built using **React** and **Material UI**.
- Integrates with **RapidAPI** for accessing the YouTube API.
- Search bar to find videos.

### Powerlist | [Github](#) | [LiveLink](#) |

- Developed a Todo application using **React**.
- Employed **local storage** to store user data and persist it between sessions
- Implemented **CRUD** functionality to manage the user's tasks.
- Utilized **React hooks** such as **useState** and **useEffect** for state management and component lifecycle methods

### Sky Sense | [Github](#) | [LiveLink](#) |

- Developed a Weather application using **React** and **Open Weather API** to display current weather information
- Utilized **asynchronous JavaScript (async/await)** to fetch real-time data from the API and update the application UI.

### Eventomania (Currently Working On)

- An online Event Management System
- Powered by MERN Stack.
- Centralized platform for managing College Events.
- Admin Dashboard features beautiful charts, ability to manage events, view audience details, view event details and so on.
